

Become a **Design Engineer** in

**Industrial Domain** for

Better Career Opportunities

## Automotive Seating System Product Design

### **POST GRADUATE DIPLOMA IN MECHANICAL CAD**

Mechanical engineers who have CAD skills are employed in manufacturing industries including automobiles, aeronautical, engineering, heavy industries, locomotives, and marine.

#### **WHY PIONEER TECHNOLOGIES ?**

- ➔ Courses as Per Industry Standards
- ➔ Experienced Trainers & Experts
- ➔ In-house Project Development
- ➔ Strong Placement Team
- ➔ Certification Program
- ➔ Excellent Infrastructure

100%  
Job Assistance

## SOFTWARE + SHEETMETAL / PLASTIC + SEATING SYSTEM

### Seating Syllabus

|   |   |
|---|---|
| ✓ | Introduction Automotive Seating                                       |
| ✓ | Introduction Seat Structure, Foam and Plastics                        |
| ✓ | Seat Ergonomics Study   |
| ✓ | Introduction of Mechanism of Seating                                  |
| ✓ | Plastic and Sheetmetal Product Design                                 |
| ✓ | Plastic and Sheetmetal Tooling Knowledge                              |
| ✓ | Seat Design Procedures, Design Methodology & Techniques               |
| ✓ | Assembly of Seating Components  |
| ✓ | Different Joining Techniques & Production Process                     |
| ✓ | Projects on Software Modules, Sheetmetal Product Design & Seat Design |
